

CAGE LEVEL SURGERY/POST OP RECORDS

If interested request some via your ULAR LAHT OR VET, we print cards on pink card stock for improved visibility

- ULAR has designed a brand new card that can be used to easily document post op care including the provision of analgesia
- **Sufficient to meet IACUC expectations for Surgery and Post OP Record**
- The record must remain with your lab notes when the cage is no longer present
- Cards are placed at the cage level and can be used to define care provided to multiple animals in one cage or multiple cages as long as there are details written on the card (for cages A3-D3)
- Please see examples below

SURGERY/POST-OP RECORD

Date/Procedure/Surgeon: _____
 Analgesia: _____
 Score: 1= normal mouse & incision, 2= abnormal mouse and/or incision, details on back, 3= euthanized

Date							
Time							
Initials							
Analgesia Given							
Score							

SURGERY/POST-OP RECORD

Date/Procedure/Surgeon: 8/10/17 HAC / JMH
 Analgesia: Motrin & Buprenorphine
 Score: 1= normal mouse & incision, 2= abnormal mouse and/or incision, details on back, 3= euthanized

Date	8/9/17	8/10	8/10	8/11	8/11	8/12	8/12
